**Xcaper Smoke Filters and Masks**

The Xcaper Smoke Filter is the world first moist direct-contact smoke and particulate filtration mask. It uses patented technology combining a natural-based aloe gel extract and negatively charged styrene beads to attract and neutralise 100% of gases like Hydrogen Cyanide, Acrolein and Carbon Monoxide. It reduces 100% of dust and particulate matter down to 3/10th of one micron. The Xcaper technology is lab-verified, approved for use by the US Navy and has been proven in tens of thousands of live fire situations over the last 8 years by more than 75,000 professional firefighters. The unique features of this smoke mask provide it with unsurpassed ease-of-use, comfort, respiration, portability and unparalleled protection.

**Xcaper Moist Filter**

The revolutionary Xcaper Moist Filter traps particulate matter and absorbing hazardous gases (Hydrogen Cyanide, Carbon Monoxide and Acrolein) common to smoke in bush fires, structural fires, overhaul, arson investigation and various SWAT situations. The filter contents include a combination of natural hypoallergenic plant extract and styrene beads which makes the filter moist and cool to the touch. The styrene beads trap particulate matter. The filter fits any shape or size face. The filter will last five to eight hours in a bush fire situation. Weight 62 g.
